Blended Intensive Programme (BIP): FOREST MANAGEMENT AND BIODIVERSITY CONSERVATION IN ROMANIA

Are you passionate about forests and their preservation? Join our blended intensive program in Braşov, Romania, where we delve into the fascinating world of sustainable forest management.

Here's what you can expect:

1. **Historical Context:** Explore the evolution of forest management in Romania, from pre-communist times to the present day.
2. **Challenges and Solutions:** Discover the enablers and barriers toward sustainable forest management. We'll discuss about forest certification, protected areas, monitoring and conservation values.
3. **Field Excursions:** Immerse yourself in Romania's lush forests during guided field trips.
4. **Biodiversity Conservation:** Understand the vital role forests play in maintaining biological diversity. Our experts will highlight conservation strategies and best practices.

Join us on this exciting journey to protect forests for generations to come!

Dates for physical activity:

08.06.2026-12.06.2026

Place: Braşov, Romania
